

Searching CRAN with packagefinder: : CHEAT SHEET

CONSOLE

```
findPackage(keywords, mode = "or", case.sensitive = FALSE, always.sensitive = NULL,
weights = c(2,2,1,2), display = "viewer", results.longdesc = FALSE, limit.results = 15, silent =
FALSE, index = NULL, advanced.ranking = TRUE, return.df = FALSE, clipboard = FALSE)
```

Most important arguments

keywords

Word or vector of words to search for

mode

Find packages with every keyword ("and") or with any of the keywords ("or")?
Will be overruled if keywords contain logical operators like keywords = "X and Y"

case.sensitive

Case-sensitive search?

always.sensitive

Vector of words that will always be treated as case-sensitive, e.g. abbreviations

limit.results

How many results to display in console or viewer?

Outputs

display

display = "console"

Examples

- > findPackage("parameters", mode = "and", always.sensitive = "SEM")
- > findPackage("meta and regression")
- > my.results <- findPackage(c("meta", "regression"), "and", return.df = TRUE)
- > findPackage("xml", display = "browser")

RSTUDIO ADD-IN

Automatically installed with the package.

Provides a graphical interface to the findPackage() and whatsNew() functions

ADDITIONAL FUNCTIONS

whatsNew(last.days = 0) Show new packages on CRAN

packageDetails(package) Show details of a CRAN package in the console

lastResults(package = "viewer") Show results of last search again

fp(...) Short hand for findPackage(...)

go(package, where.to = "details") Install CRAN package, show PDF manual, details or package website
